

ChillSloth (CHSL) Whitepaper

The Chill Memecoin on Solana

Version 1.0 — 2025

1. Introduction

ChillSloth (\$CHSL) is a community-driven memecoin project on the Solana blockchain. It was created to combine humor, culture, and sustainable growth, while keeping things simple and fun. Unlike many memecoins that disappear quickly, ChillSloth is designed with a clear roadmap, transparent tokenomics, and long-term plans.

2. Vision

Our vision is to build a chill and entertaining ecosystem around ChillSloth. We aim to create a strong, supportive community, explore NFT concepts, and develop a mobile game where \$CHSL plays a real in-game role. By 2026, ChillSloth plans to be recognized as more than just a meme token, but as a fun and utility-based project on Solana.

3. Tokenomics

Token name: ChillSloth

Ticker: CHSL

Blockchain: Solana (SOL)

Total supply: 1,000,000,000 CHSL

Distribution at mint:

- 65% Liquidity Pool
- 20% Community & Airdrops
- 15% Team & Development (vesting)

Circulation: 100%

Solana Contract Address: 2ZmAUqciYX8ThigFfjQaxw4YbhHUmSRUd5saG3Qgmoon

4. Roadmap

Phase 1 — Launch

Website, token launch, first listings, community setup.

Phase 2 — Growth

Meme contests, partnerships, influencer push, CEX outreach.

Phase 3 — Utility

NFT concept, tools for holders.

Phase 4 — Game

Teaser and mobile game for iOS & Android with \$CHSL integration, targeted for late 2026.

5. Conclusion

ChillSloth embraces the fun spirit of memecoins while striving to create long-term value through community engagement, transparency, and utility. With clear tokenomics and a roadmap leading to a real game release, ChillSloth is built to last — take it slow, but steady.

6. Disclaimer

ChillSloth (\$CHSL) is a community-driven meme project and should not be considered financial advice or an investment recommendation. Cryptocurrencies are volatile and carry significant risk. Always do your own research (DYOR) before participating. The ChillSloth team does not guarantee any financial returns and is not responsible for potential losses.
